

## BELLOTA 100% IBÉRICO PORK SHOULDERHAM

### *A high quality product with an unbeatable flavour*

Our acorn-fed shoulder comes only from **selected pure-bred Iberico pork**, with strictly extensive farming, **raised free-range** in the **oak forests** of south-west peninsular Spain. Like our acorn-fed Iberico ham, it is the culmination of a long preparation process: Iberian breed, oak forest, natural feed, salt, rest and time.

Our Iberico pigs are fed on **acorns and grass** during the “**Montanera**” (**acorn-fed season**). This feed, rich in proteins, glycodes and fats, in combination with plenty of exercise for the pig roaming free, aids the development of its musculature with the perfect proportion of meat and fat necessary to produce the characteristic **marbling**, which distinguishes the organoleptic quality of the meat.

The high proportion of **oleic acid** in the fat gives it its unique aromas and flavours, **exclusively from the acorn**. Prepared **traditionally**, the shoulders are cured in natural drying rooms and matured in our **Jabugo cellar**.

A noble, exquisite product, comparable to the Acorn-fed Iberico ham for its juiciness, texture, aroma, flavour and nutrients.

**CHARACTERISTICS:** A slender ham, with a black trotter and slim bone. The external fat is soft with a smooth texture. Its profile has the characteristic half-moon cut.

**CURING:** Between 18 and 24 months.
